

ORWAK 3105

Orwak 3105 is the smallest front loaded baler in our range and it is perfect for companies with small amounts of packaging waste. The low height in combination with the small footprint make it fit where you need it to be! A special mode for successful compaction of soft plastic!

**SMALL
FOOTPRINT**

MORE PRODUCTIVE USE OF TIME

Less time spent on waste handling, more time devoted to your core activities.

VOLUME REDUCTION

More compaction = less waste volume to transport for recycling or disposal. Fewer transports required results in lower transportation costs and reduced CO₂ emissions.

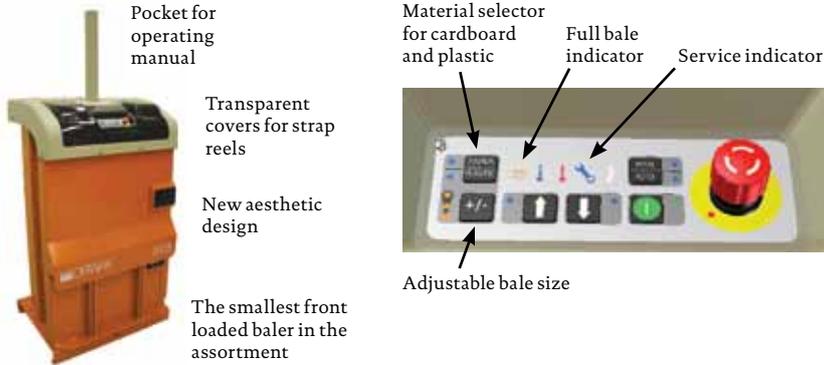

MORE SPACE

Our baler rapidly minimizes the space the waste takes up, keeping aisles and passageways free and tidy.

ORWAK 3105

Compact and flexible baler - fits where you need it!

ORWAK 3105 IS OPTIMIZED FOR:

PAPER

- + Cardboard
- + Shredded
- + Paper sacks

PLASTIC FOIL

- + Shrink film
- + Plastic bags

ADJUSTABLE BALE SIZE

The cardboard bales weigh up to 40 kg and are easily handled with our bale trolley. Orwak 3105 offers adjustable bale height in three different sizes.

SILENT OPERATION CONTRIBUTES TO A BETTER WORKING ENVIRONMENT

Due to a silent type of hydraulics, the sound emission is low, which contributes to improving the working environment for the employees and is an important feature if the baler is installed close to customers.

BALE TROLLEY INCLUDED

Orwak 3105 is always delivered with a bale trolley for easy baling and internal transportation of the bale.

SMALL FOOTPRINT

The low height in combination with the small footprint make Orwak 3105 fit where you need it to be!

EFFECTIVE COMPACTION

It is a small but effective baler and it gives a volume reduction of 5:1! An autostart function allows the baler to start compacting the material as soon as you close the door.

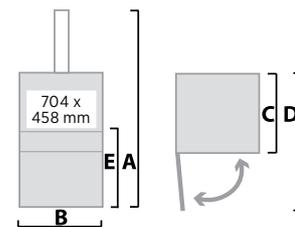

MATERIAL SELECTOR

A material selector makes the choice between compacting cardboard and plastic easy. In the "plastic mode", the press plate stays down for 30 seconds to squeeze out more air from the voluminous soft plastic.
