

ORWAK 3115

The Orwak 3115 is ideal for small volumes of plastic foil, but it is also designed for cardboard compaction. A material selector makes selection easy! The cross-binding function gives a tight grip of the bale and is helpful for compaction of soft plastic or of small pieces of material.

MORE PRODUCTIVE USE OF TIME

Less time spent on waste handling, more time devoted to your core activities.

VOLUME REDUCTION

More compaction = less waste volume to transport for recycling or disposal. Fewer transports required results in lower transportation costs and reduced CO₂ emissions.

MORE SPACE

Our baler rapidly minimizes the space the waste takes up, keeping aisles and passageways free and tidy.

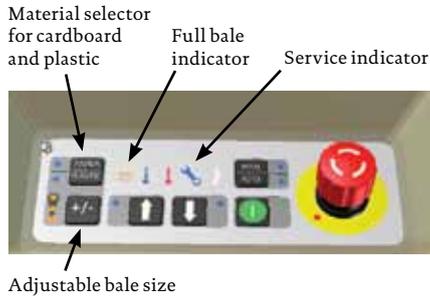

ORWAK 3115

Compact and flexible baler - fits where you need it!

Pocket for operating manual
Transparent covers for strap reels
New aesthetic design

ORWAK 3115 IS OPTIMIZED FOR:

PAPER

- + Cardboard
- + Shredded
- + Paper sacks

PLASTIC FOIL

- + Shrink film
- + Plastic bags

OTHER METALS

- + Steel straps

OTHER PLASTICS

- + Plastic straps

ADJUSTABLE BALE SIZE

The cardboard bales weigh up to 60 kg, and the Orwak 3115 offers three different sizes of bale height for more flexible waste management.

AUTOSTART FOR EFFICIENT COMPACTION

An autostart function allows the baler to start compacting the material as soon as you close the door.

SILENT OPERATION CONTRIBUTES TO A BETTER WORKING ENVIRONMENT

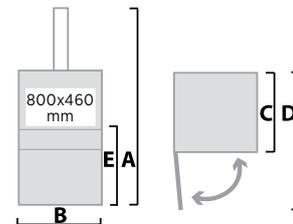

Due to a silent type of hydraulics, the sound emission is low, which contributes to improving the working environment for the employees and is an important feature if the baler is installed close to customers.

PREPARED FOR CROSS-BINDING

The Orwak 3115 is designed for cross-binding - a function that helps secure the bales and one that is particularly useful when compacting small pieces of material.

DIMENSIONS AND SPECIFICATIONS

Dimensions				
A	B	C	D	E
1990 mm	1070 mm	790 mm	1535 mm	650 mm

WEIGHT (MACHINE) TOTAL: 380 KG
